## Summary

I have been engaged in WordPress development for more than 5 years, working on a variety of projects. Presently, I am working as a freelance software developer and also pursuing personal projects to enhance my skills. Additionally, I am actively seeking a job position that will allow me to further upskill and contribute my expertise to a dynamic team.

## Experience

### **Software Engineer (Freelance)**

Victorious Korean Language Learning Center

February 2023 – September (8 months)

- Collaborate with the client to understand their requirements for the school portal web app.
- Develop a user-friendly web application using Next.js and Firebase.
- Implement user authentication and data storage with Firebase.
- Ensure functionality and performance through extensive testing and debugging.
- Provide ongoing support and maintenance.

### **WordPress Developer (Freelance)**

College of Home Economics, UP Diliman

November 2022 – February 2023 (4 months)

- Collaborate closely with the College of Home Economics to understand their website requirements and preferences.
- Develop a custom WordPress website using the Elementor page builder, ensuring it aligned with the client's design preferences while maintaining functionality.
- Conducted thorough testing and troubleshooting to optimize website performance.

### **Web Developer**

Lokal

September 2020 – August 2022 (2 years)

- Lead the development of responsive WordPress websites with Elementor.
- Customize Shopify websites using PageFly to meet client specifications.
- Integrate various WordPress plugins for security, performance, and functionality.
- Conduct routine website maintenance, including updates and backups.
- Collaborate with cross-functional teams to meet project deadlines.

## **Web Developer**

Anderson Group BPO, Inc.

May 2019 – July 2020 (1 year 3 months)
